

PREVENT UNAUTHORIZED ACCESS TO YOUR PROPERTY

with State-of-the-Art
Security Gates

CANTILEVER SLIDE GATES

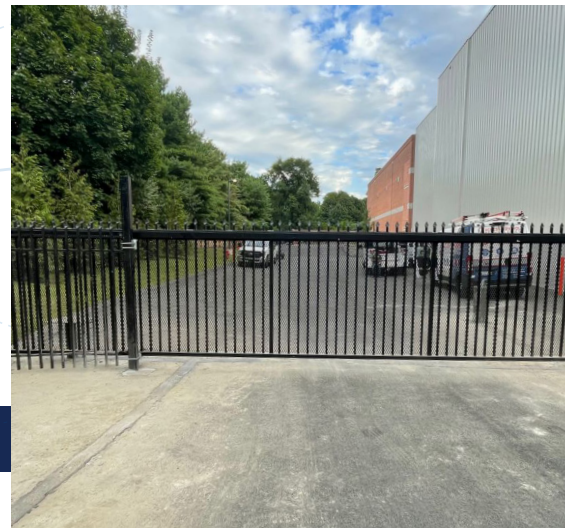

If you're looking for a durable, easy-to-maintain gate that slides open to allow access to a facility, the **ACT Cantilever Slide Gate** may be your answer. The cantilever gate is supported by rollers that keep the gate suspended above the ground, braced on each side by support posts, meaning it does not sit on a track and slide open and closed.

The advantage of the cantilever gate is that even in snowy climates, the gate can operate properly since it doesn't come in contact with the track on the ground, so a snow-covered track is not an issue. We cut, weld, and assemble these gates ourselves, so turnaround is fast and reliable. It's a very cost-effective option, saving you money from the start.

Our Cantilever Slide Gates:

- Slides open from one end of the entrance to the other
- Durable and easy to maintain
- Cost effective, saving you money up front
- Fast and reliable turnaround
